LOYAL BYTES

Simplifying your journey to the cloud

Loyal Bytes has come a long way since its inception in 2013. We have emerged as a well-recognized provider of cloud solutions, infrastructure services, advance networking, unified communications, security, server, storage solutions and modern work. We cater to our clients the best solutions and support when it comes to cloud, mobility, security and compliance, decision science, data management, collaboration, and other disruptive technologies. When we do work well it helps our clients do theirs better. We believe that our job is to listen, understand and research on the requirements unique to each individual business. Infact it is the long term relationships with our clients that has served as a solid foundation for our company. Loyal Bytes has its operations across Middle East, Africa, UK, Germany backed with a powerful global business development center in India.

WHO WE ARE

DISRUPTION IS JUST ANOTHER OPPORTUNITY FOR INNOVATION FOR US.

We are not just another bunch of tech guys. Infact a lot more than that. Taking your business to a next level with our experience and foresight is one of the many other things we do well. We are a niche IT services Organization with profound efficiency in Microsoft Cloud Solutions, IT Infrastructure and IT Service Management. We have a talented team comprising of Principal Solutions Architects, Technologists and Problem Solvers holding more than a decade worth experience. We are backed with 24*7 customer support. Our offerings cover the entire range of cloud and data services precisely from the Enterprise Domain.

MIGRATIONS & ADOPTIONS

- CLOUD ASSESSMENTS AND MIGRATIONS
- ADOPTION AND CHANGE MANAGEMENT
- ENTERPRISE MIGRATIONS

CONSULTATION AND SOLUTION DESIGNING

- CLOUD CONSULTING AND INTEGRATION SERVICES
- DESIGNING AND ARCHITECTING CLOUD SOLUTIONS
- PROJECT LIFE CYCLE MANAGEMENT
- DIGITAL MODERNIZATION

SECURITY, GOVERNANCE AND COMPLIANCE

- SECURITY ADVISORY CONSULTING
- SECURITY ASSESSMENT, DESIGN AND IMPLEMENTATION
- INFORMATION PROTECTION FOR DATA PRIVACY REGULATION
- ENHANCED REMOTE WORKING WITH SECURITY AND GOVERNANCE

MIGRATIONS & ADOPTIONS

◉ CLOUD ASSESSMENT AND MIGRATIONS

- 📌 Cloud environment needs regular assessments to mitigate risks.
- 📌 Cloud assessment = estimation of cost + risks + outcomes to transfer to cloud
- 📌 Why choose us:
 - At Loyal Bytes your data is always safe, as trust and excellence is the very foundation of our professional relationships
 - For the customized and trust worthy Migrations your information deserves and the professional approach your business needs – Choose Us

◉ ADOPTION AND CHANGE MANAGEMENT

- 📌 In the dynamic world of technology, change and innovations are the only two constants Cloud
- 📌 More than embracing the change its about harnessing the most about the change
- 📌 Why choose us:
 - At Loyal Bytes we believe that the data backed with impeccable research builds the foundation of envisioning any change.
 - We ensure that when the technological change does come around it comes with its due impact

◉ ENTERPRISE MIGRATIONS

- 📌 Cloud migration involves the transfer of your on-premise organizational data to a virtual pool of data that is universally accessible.
- 📌 In this digital age your business deserves to be digital too
- 📌 Why choose us:
 - Based on the 5 R's of cloud migration – rehost, refactor, revise, rebuild, and replace – we ensure that your on-premise architecture remains intact as it makes the digital journey.

CONSULTATION AND SOLUTION DESIGNING

CLOUD CONSULTING AND INTEGRATION SERVICES

- Once identified the need to shift from on premise to cloud, the first step towards boosting the business is achieved.
- There's more to it than just shift and we ensure you get it right
- Why Choose Us:
 - At Loyal Bytes we ensure the translation of your business objectives into feasible ROIs is a seamless process
 - No 2 businesses are the same and neither are their needs, which is why our solutions are tailor made.

DESIGNING AND ARCHITECTING:

- There is no single blueprint for success that will suit the needs to every business out there.

The solutions must be designed after due research and assessment and we understand that

Why Choose Us:

- The design and architecture of any cloud is its very foundation which is why we believe in making it strong and future proof
- We deploy our solutions after an intensive analysis of your needs, capabilities and expectations.

PROJECT LIFE CYCLE MANAGEMENT:

- Businesses need proper planning and execution when it comes to scaling up through migration and development

From the 1st step of the project to its deployment and execution until its monitoring and visible growth – a project needs to be supervised through its stages

Why Choose Us:

- At Loyal Bytes, From intensive ideation and development to dedicated execution and effective outcomes – with our support team of experts, we take care of your requirements every step of the way.

DIGITAL MODERNISATION

- Technological Advancement aren't just a trend anymore; they are an imperative resource that every business must take benefit from:

Business goals can be easier to achieve with technological support backing them up

Why Choose Us:

- Our approach has always been to give our clients exactly what they need
- Our methodology is intensive when it comes to understanding why and how a shift from an on premise environment has to be made to a cloud eco system.

SECURITY GOVERNANCE AND COMPLIANCE

Security Advisory Consulting

- Whether the data is on premise, in cloud or in a hybrid environment, it must be kept confidential, secured and accessible by authorized users at all times
- Why Choose Us:
 - We respect the sovereignty of your data. This is why we strive to treat and store it accordingly
 - At Loyal Bytes, we do our best to keep your data safe through end to end designing, 24*7 monitoring and much more.

Security Assessment, Design and Implementation

- Going digital comes with its own security threats
- But just as there is no dearth of threats, we have no end to our solutions.
- Why Choose Us:
 - At Loyal Bytes, our assessment runs deep into your data, analytics, and capabilities
 - Based on the needs of your organization, we develop an infallible security strategy that works in tandem with end-to-end security infrastructure, and additional security measures

Enhanced Remote Working

- Remote working seems like the only option in the foreseeable future, but it doesn't come without threats
- From the security threats that come with users using unauthorized devices to access data to the possibility of a data breach – a lot of care must be taken to avoid these issues
- Why Choose Us:
 - At Loyal Bytes Our experts analyse the capabilities and requirements of your IT infrastructure, and identify pre-existing and eminent threats
 - Once that is removed we build a secure environment of seamless collaborations and communications.

CLOUD-AGE SOLUTION IS THE NEW AGE SOLUTION.

At LoyalBytes, we assist our clients with the new age solutions deployment which provides them with an upper-edge in the market.

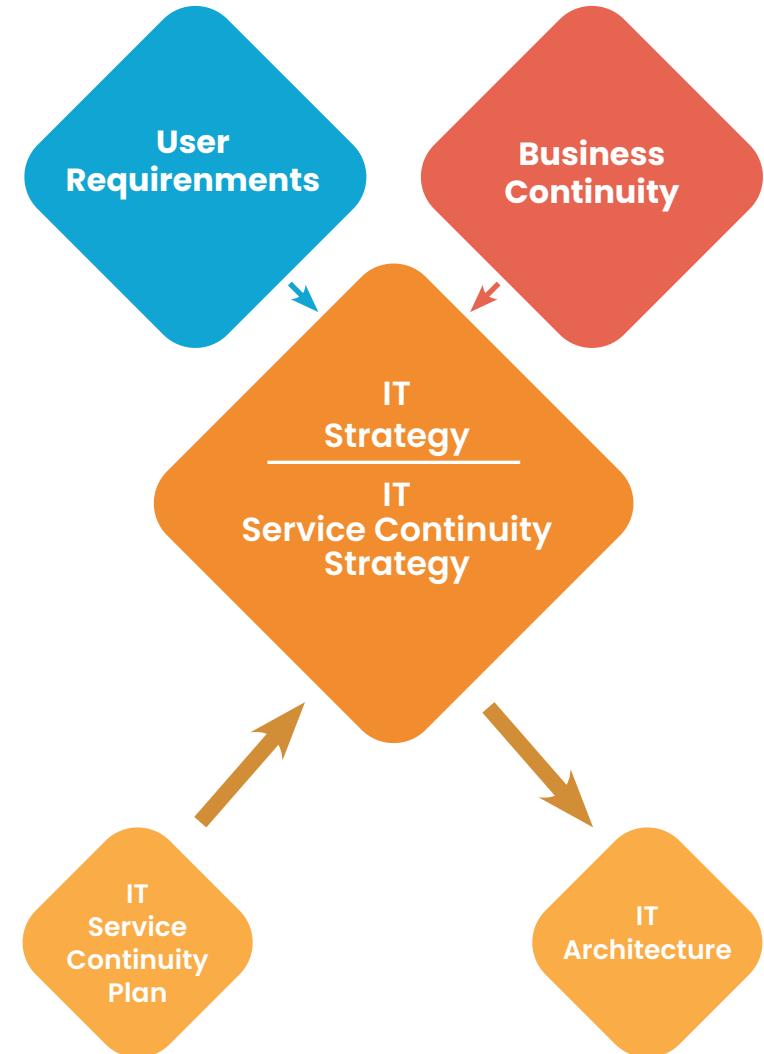

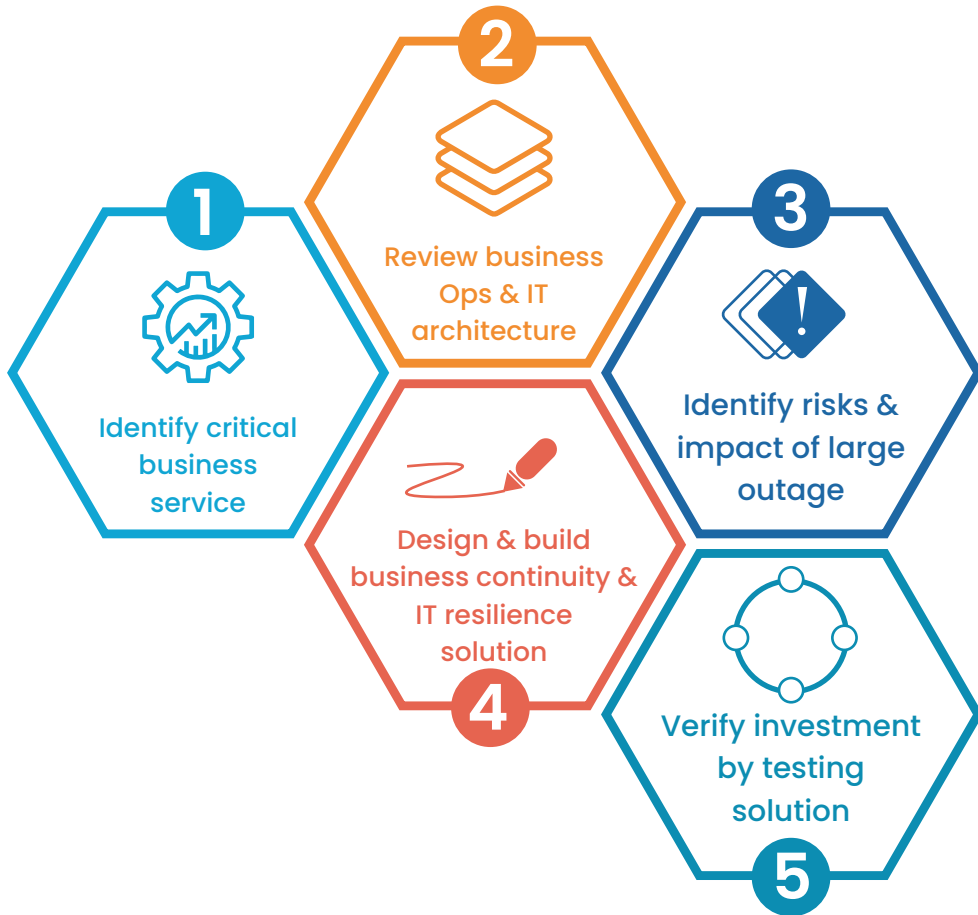

MICROSOFT AZURE CLOUD FOR ENTERPRISE

BUSINESS CONTINUITY AND DISASTER RECOVERY WITH MICROSOFT AZURE

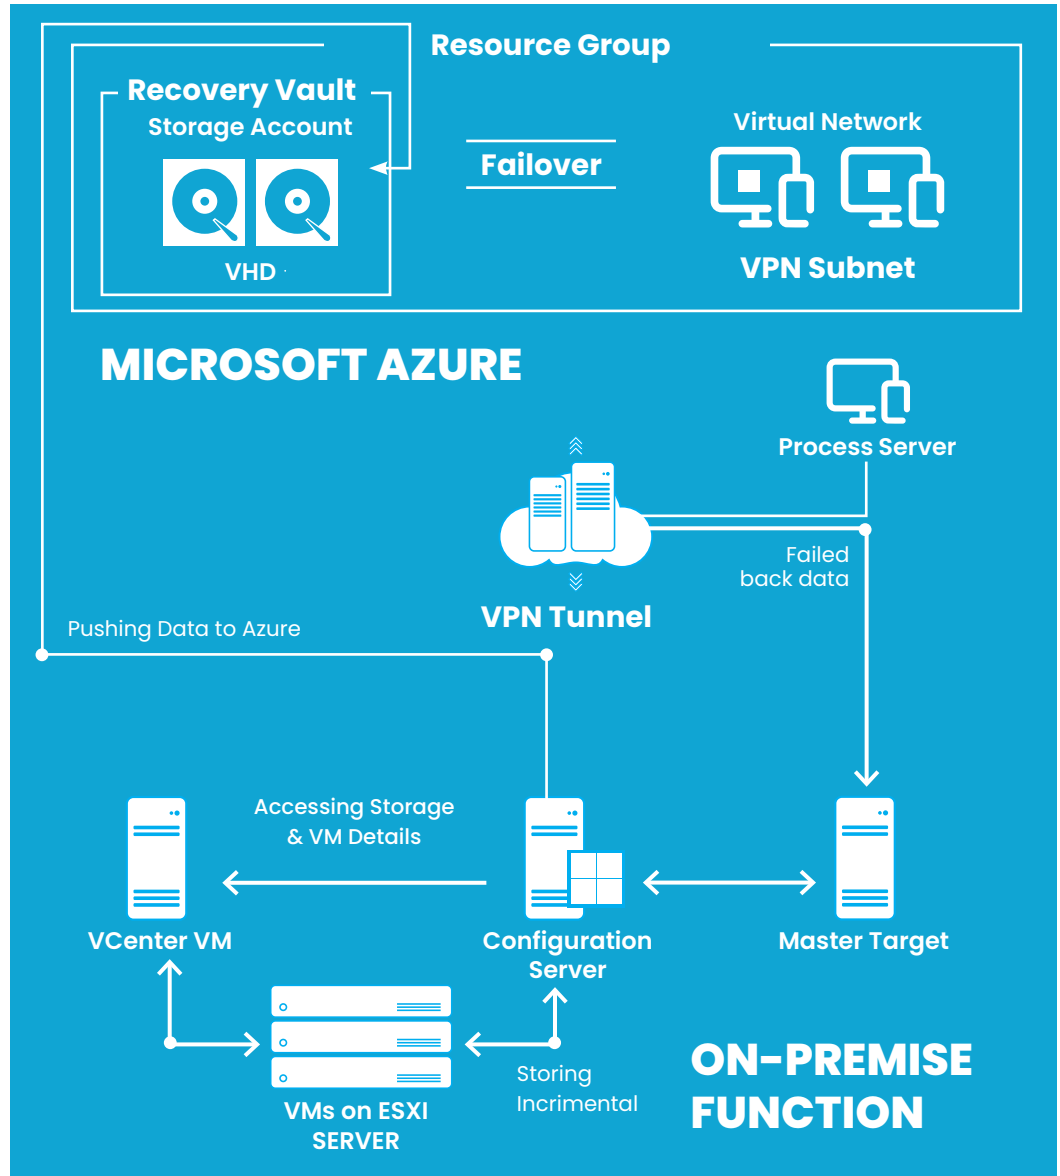

Introduction

The Microsoft Azure platform allows us to choose from over 250+ products and services. It can build, run, and manage applications across multiple clouds while also making for a personalized experience with the tools and frameworks of your choice. Explained simply, it helps you solve your issues even faster, all thanks to the largest global coverage with more datacenters than any other cloud provider in the world.

DISASTER RECOVERY:

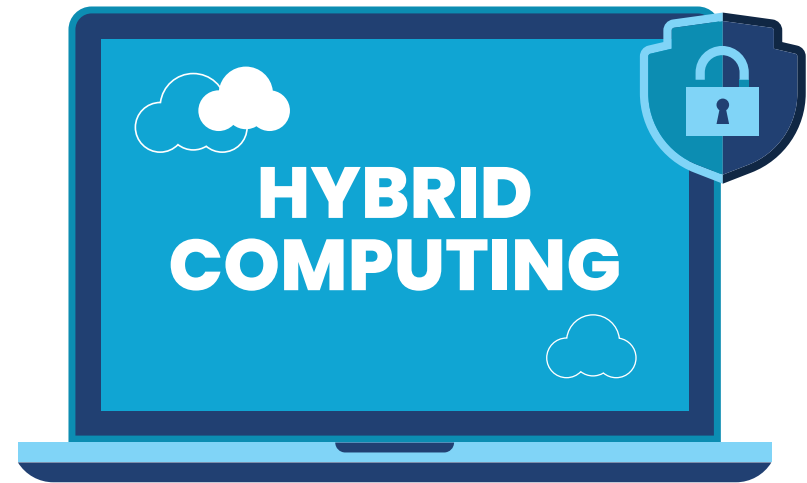

HYBRID AND MULTI-CLOUD COMPUTING

Introduction

You don't have to be everywhere to be everywhere. With Microsoft Azure's hybrid and multi-cloud computing capabilities, you can manage all of your infrastructure from a single place. Working remotely has never been so easy.

On Premises

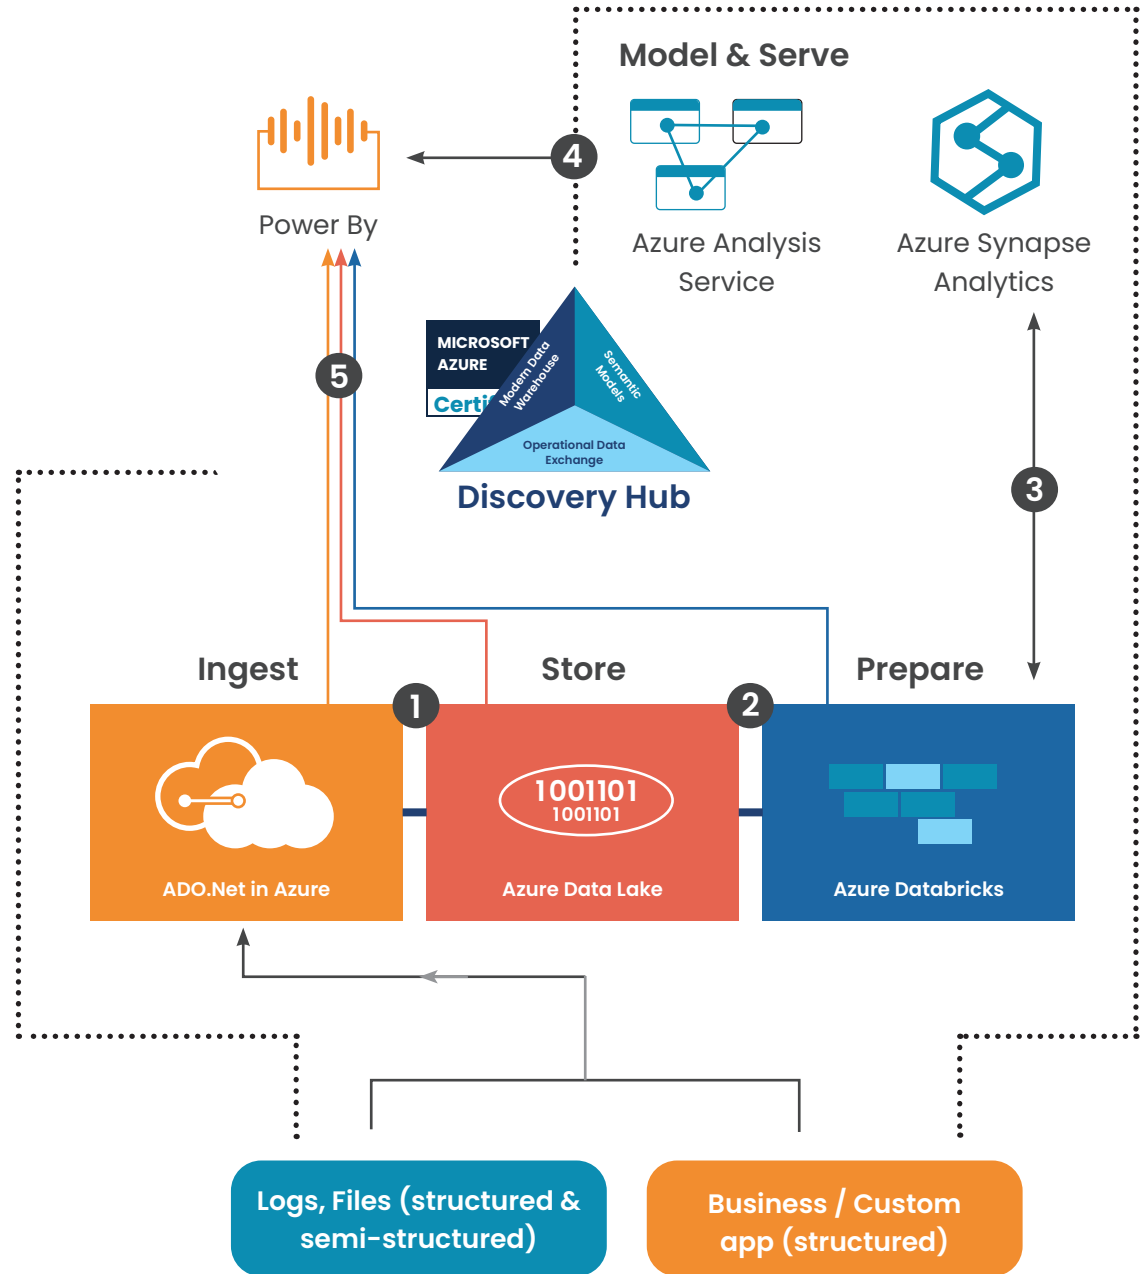

APPLICATION AND ANALYTICS

DATA AND ANALYTICS

Introduction

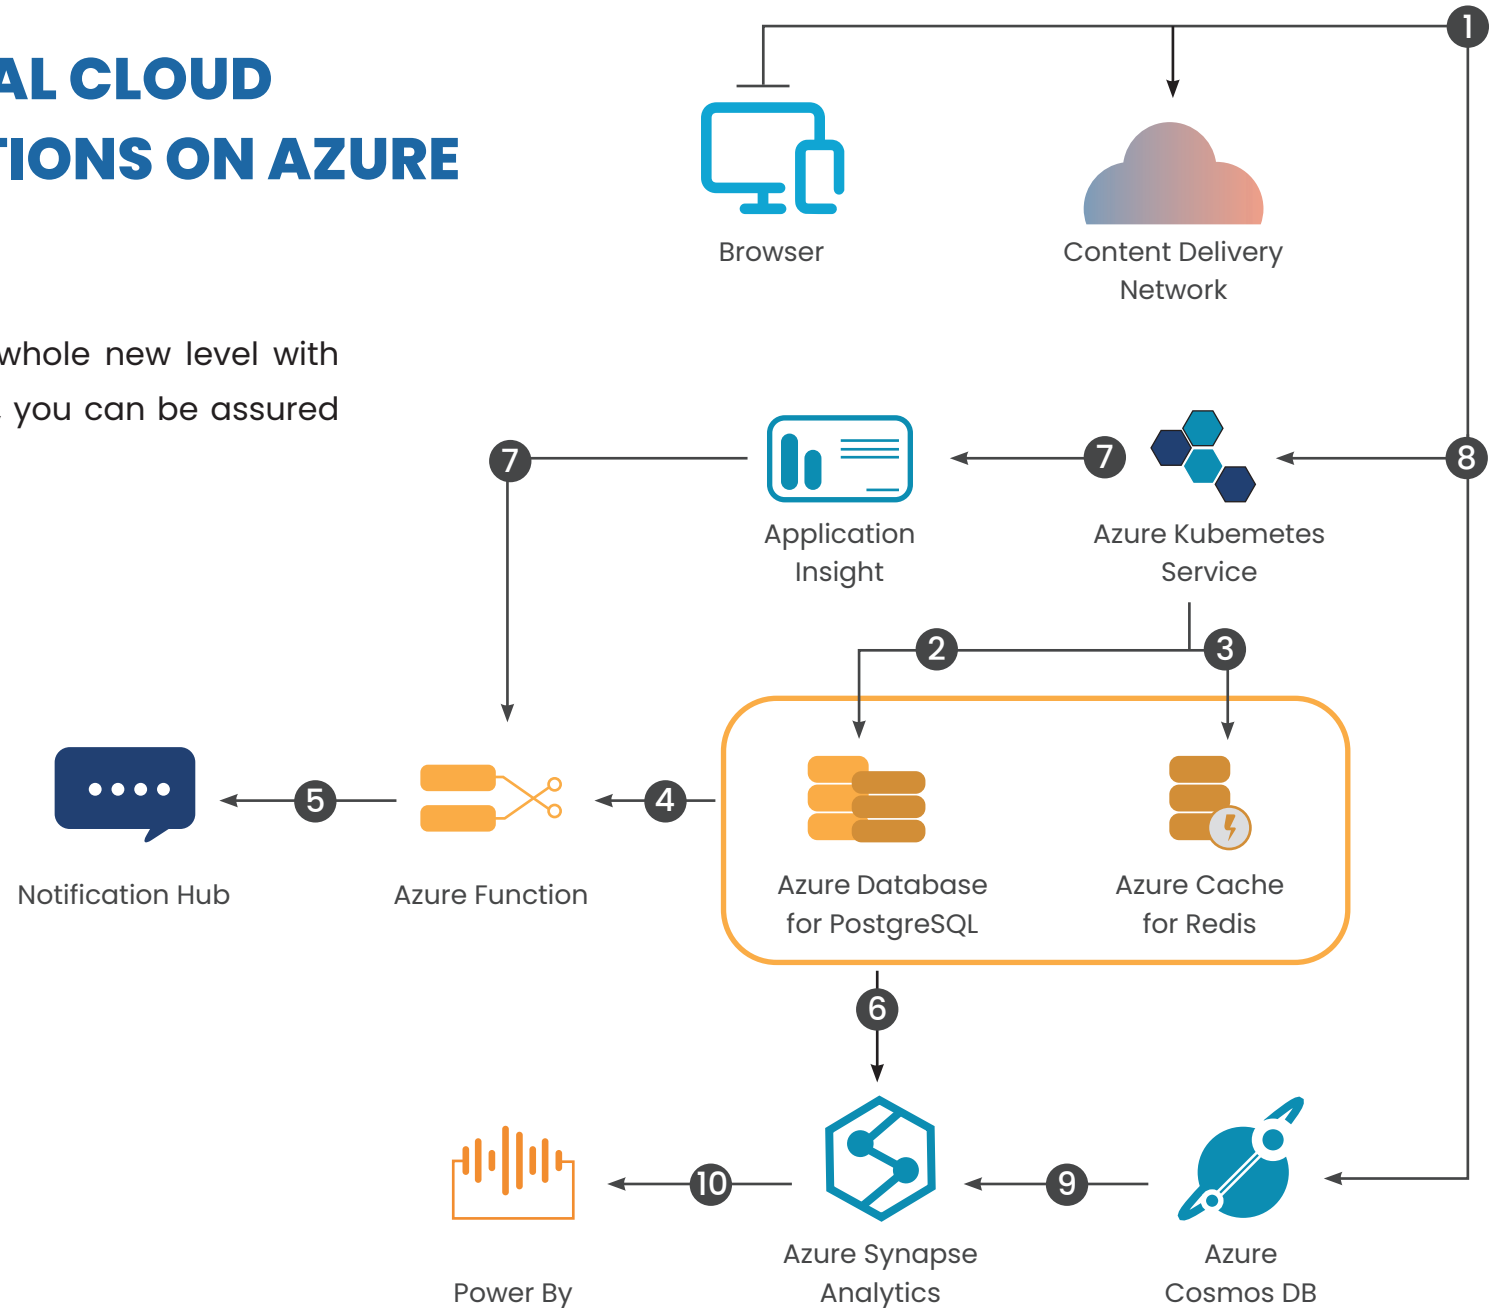

Is your business as efficient as it can be? Azure's product portfolio boasts of features that can boost your efficiency multi-fold.

BUSINESS CRITICAL CLOUD NATIVE APPLICATIONS ON AZURE

Introduction

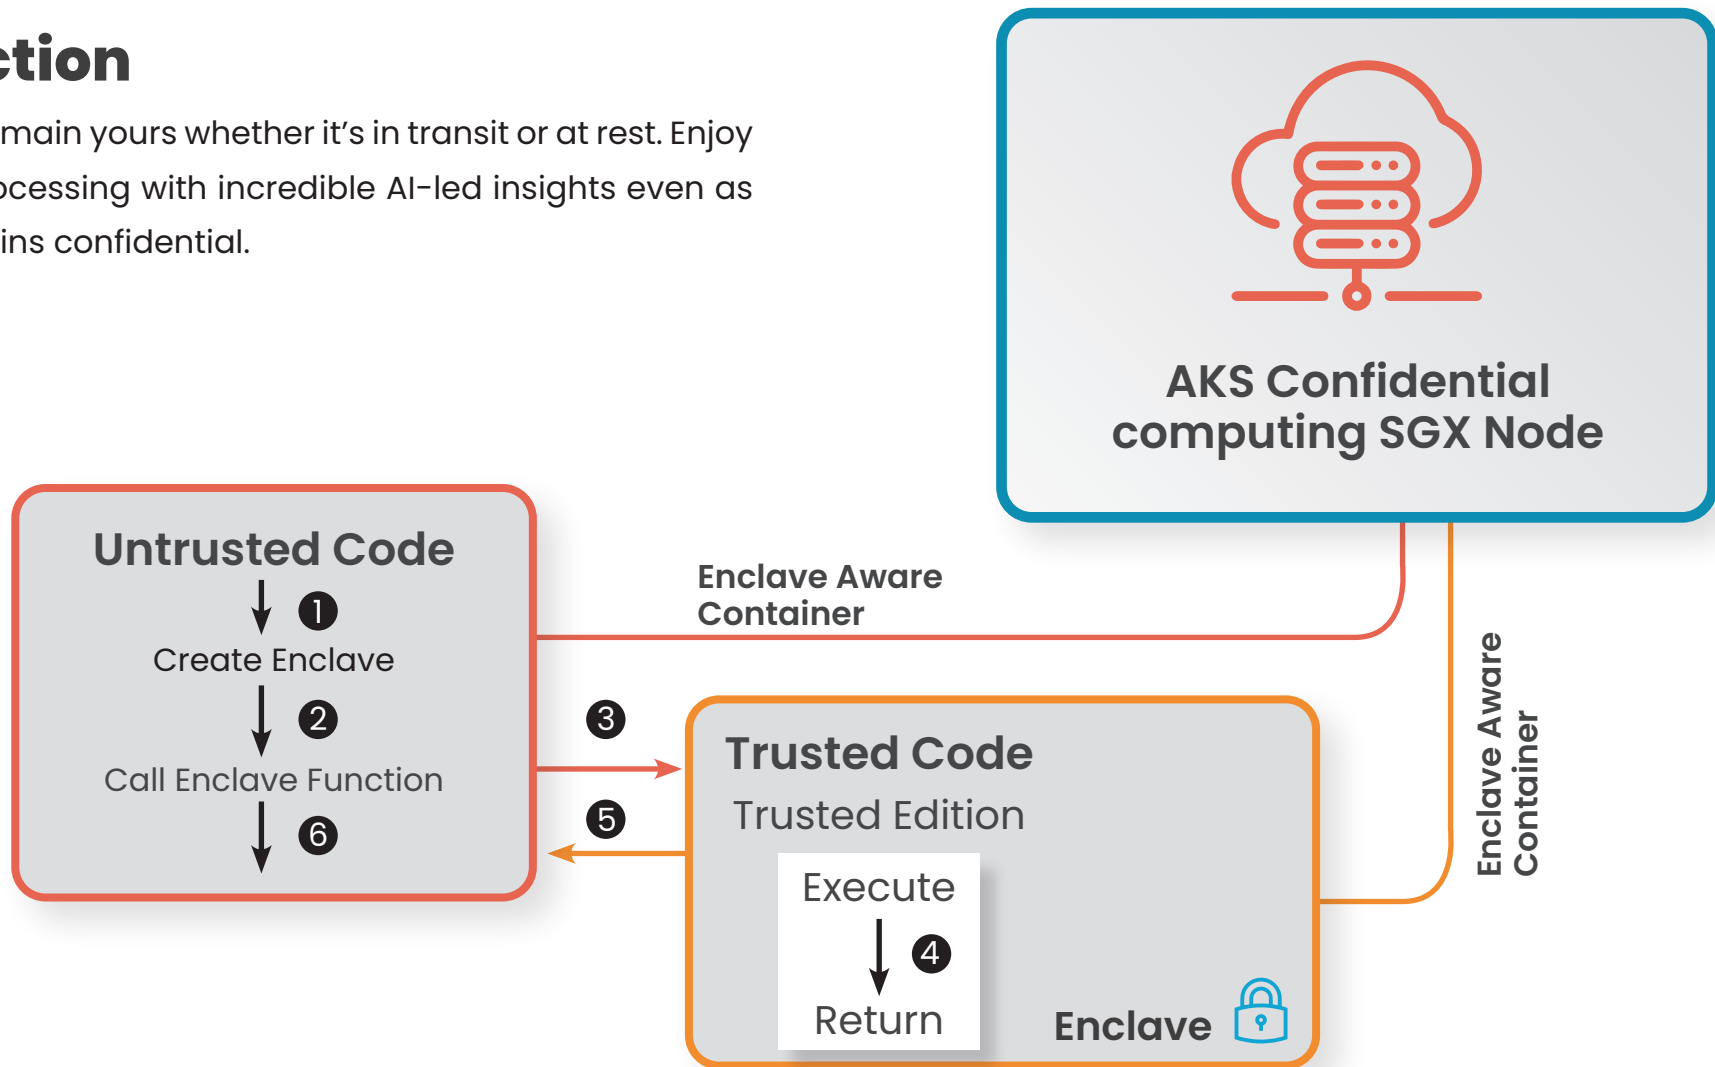

Development has shifted to a whole new level with Azure. Whatever your needs be, you can be assured that your software will keep up.

CONFIDENTIAL COMPUTING WITH AZURE

Introduction

Your data will remain yours whether it's in transit or at rest. Enjoy secure data processing with incredible AI-led insights even as your data remains confidential.

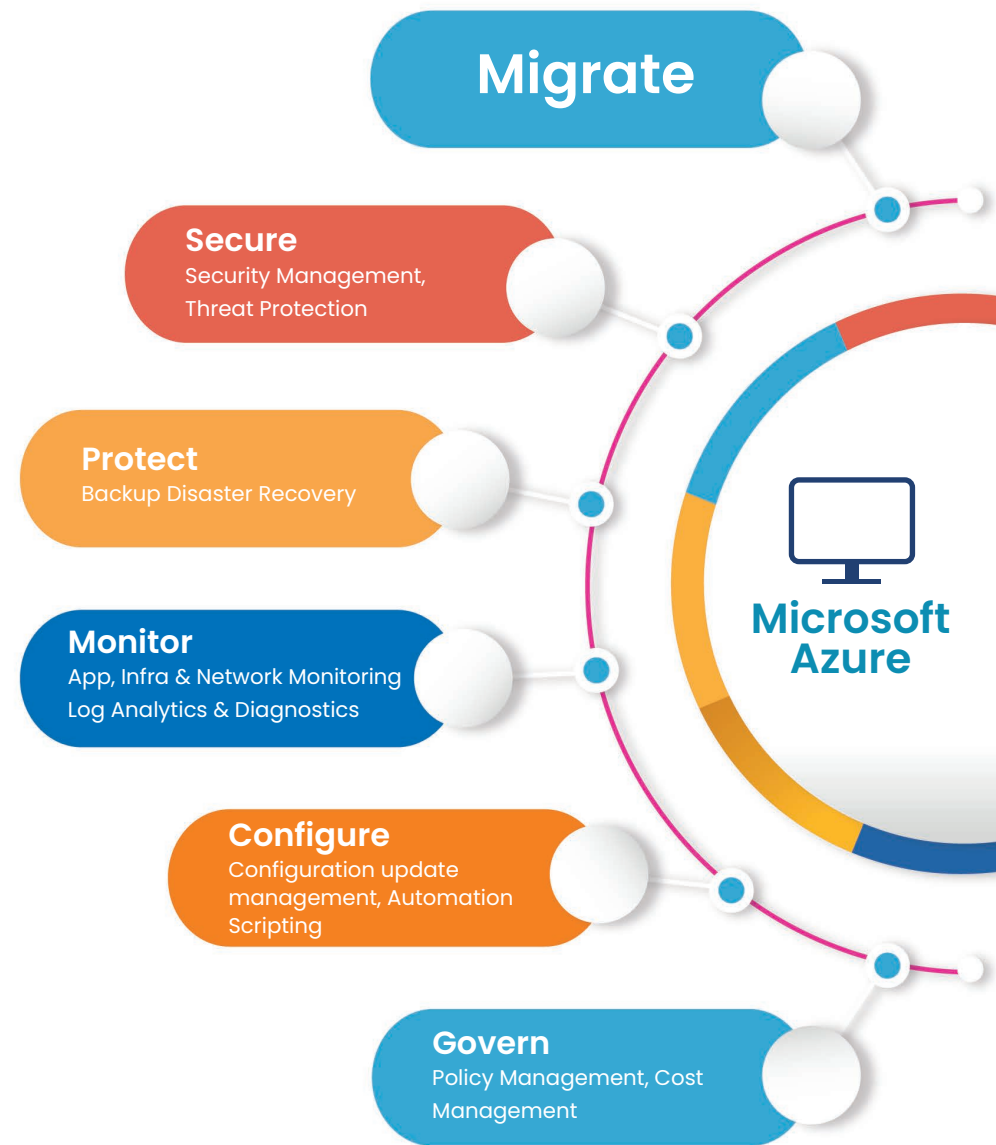

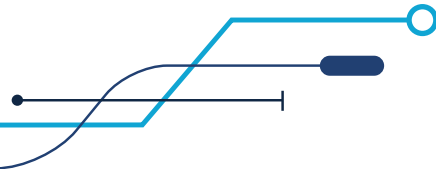

SECURITY, GOVERNANCE AND COMPLIANCE

SECURITY AND GOVERNANCE WITH MICROSOFT AZURE

Introduction

Embracing the Internet of Things (IoT) to upgrade businesses has seen a rise. But why do it at all if you won't do it safely? In the modern digital sphere, there is no dearth of threats to your data. Fortunately, there's no dearth of protection as well, when it comes to Microsoft Azure, and the AI models of Microsoft Security Solutions.

COMPLIANCE WITH MICROSOFT 365

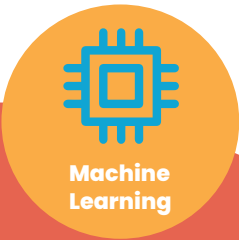

Introduction

When your needs are unique, your solutions should be, too.

AZURE FOR NEW ERA

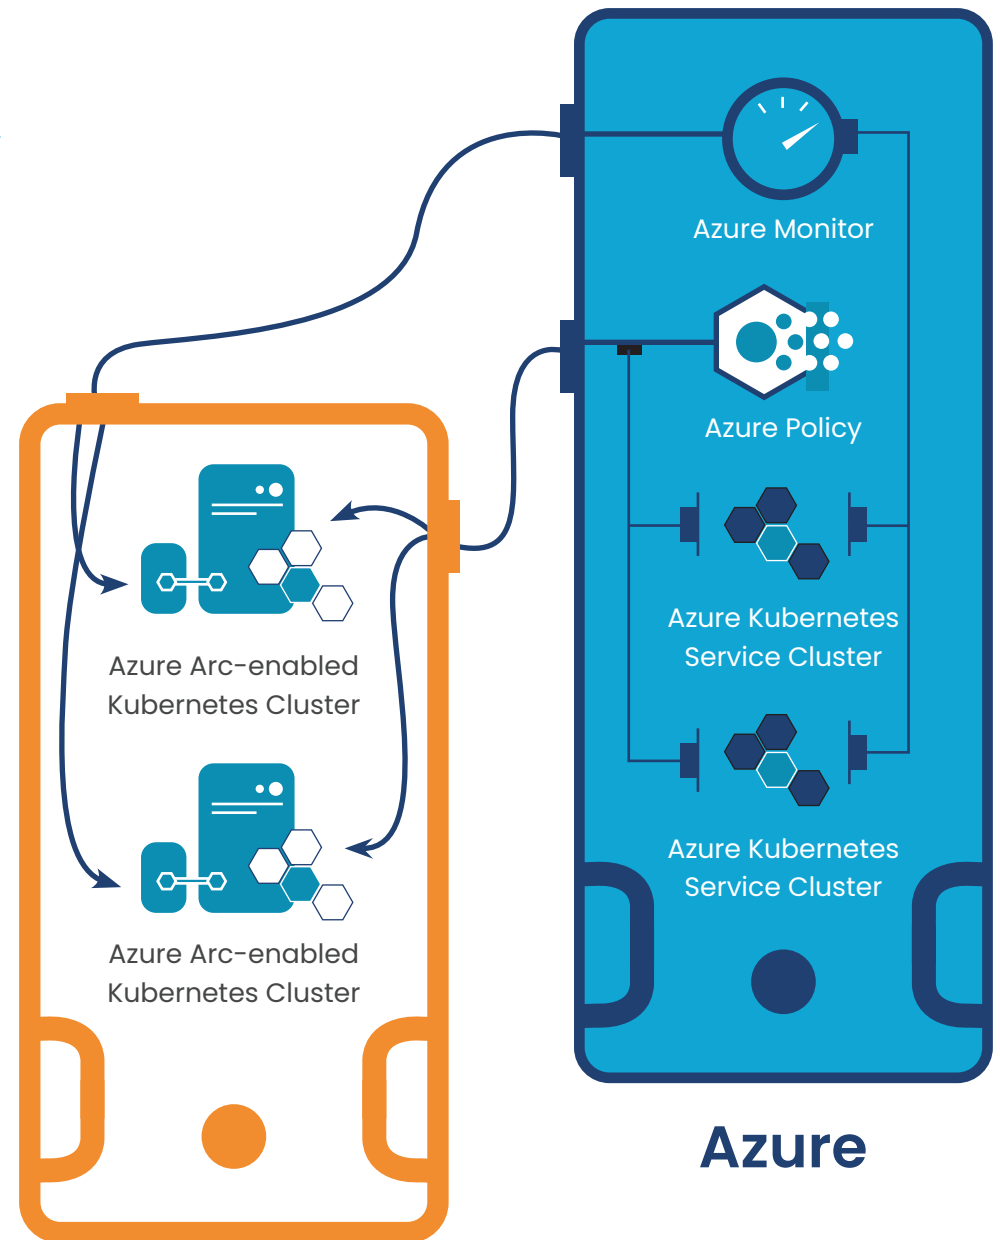

AZURE ARC

Introduction

Imagine everything you need to manage your software and infrastructure in a centralized set-up, where you can access and manage Windows, Linux and SQL servers, and build apps anywhere. That's Azure Arc for you.

On-Premises

HYPER CONVERGED INFRASTRUCTURE WITH AZURE STACK

Introduction

Make your tech truly boundless. Enhance your Azure experience to match the needs of your business - no matter your industry - with Azure Stack. Choose the environment that suits you best from data centres, edge locations, and remote offices.

STACK EDGE

A consolidated solution for your Internet of Things (IoT) and Artificial Intelligence workloads, Stack Edge works best for your edge-computing needs. From machine learning at the edge to a seamless transfer of data from edge to cloud, get the best performance and solutions.

STACK HCI

Upgrade your datacenter with the best modern solutions through a hybrid solution linked with Azure. It works best when it comes to scaling up virtualization and storage needs in remote branch offices with high-performance workloads.

STACK HUB

Azure Stack HUB is a cloud-native integrated system that allows you to establish and control a private cloud which can be connected or disconnected with cloud-native apps. Modernize the apps you build and control across scenarios while maintaining the pertinence of your data.

MICROSOFT 365 SOLUTIONS

PRODUCTIVITY ANYWHERE

Introduction

We make remote work easy. And we do it well with Microsoft 365. Say hello to real-time collaborations across geographical boundaries through an integrated system tailored for your needs.

TEAMWORK AND COLLABORATION WITH MICROSOFT 365

Introduction

Microsoft Teams, when coupled with the power of Microsoft 365, build the foundation for efficiency in tasks performed at any organization. When the entire team works in sync through a system of real-time collaborations, great work is bound to happen.

EMPOWER REMOTE WORK WITH MICROSOFT 365

Introduction

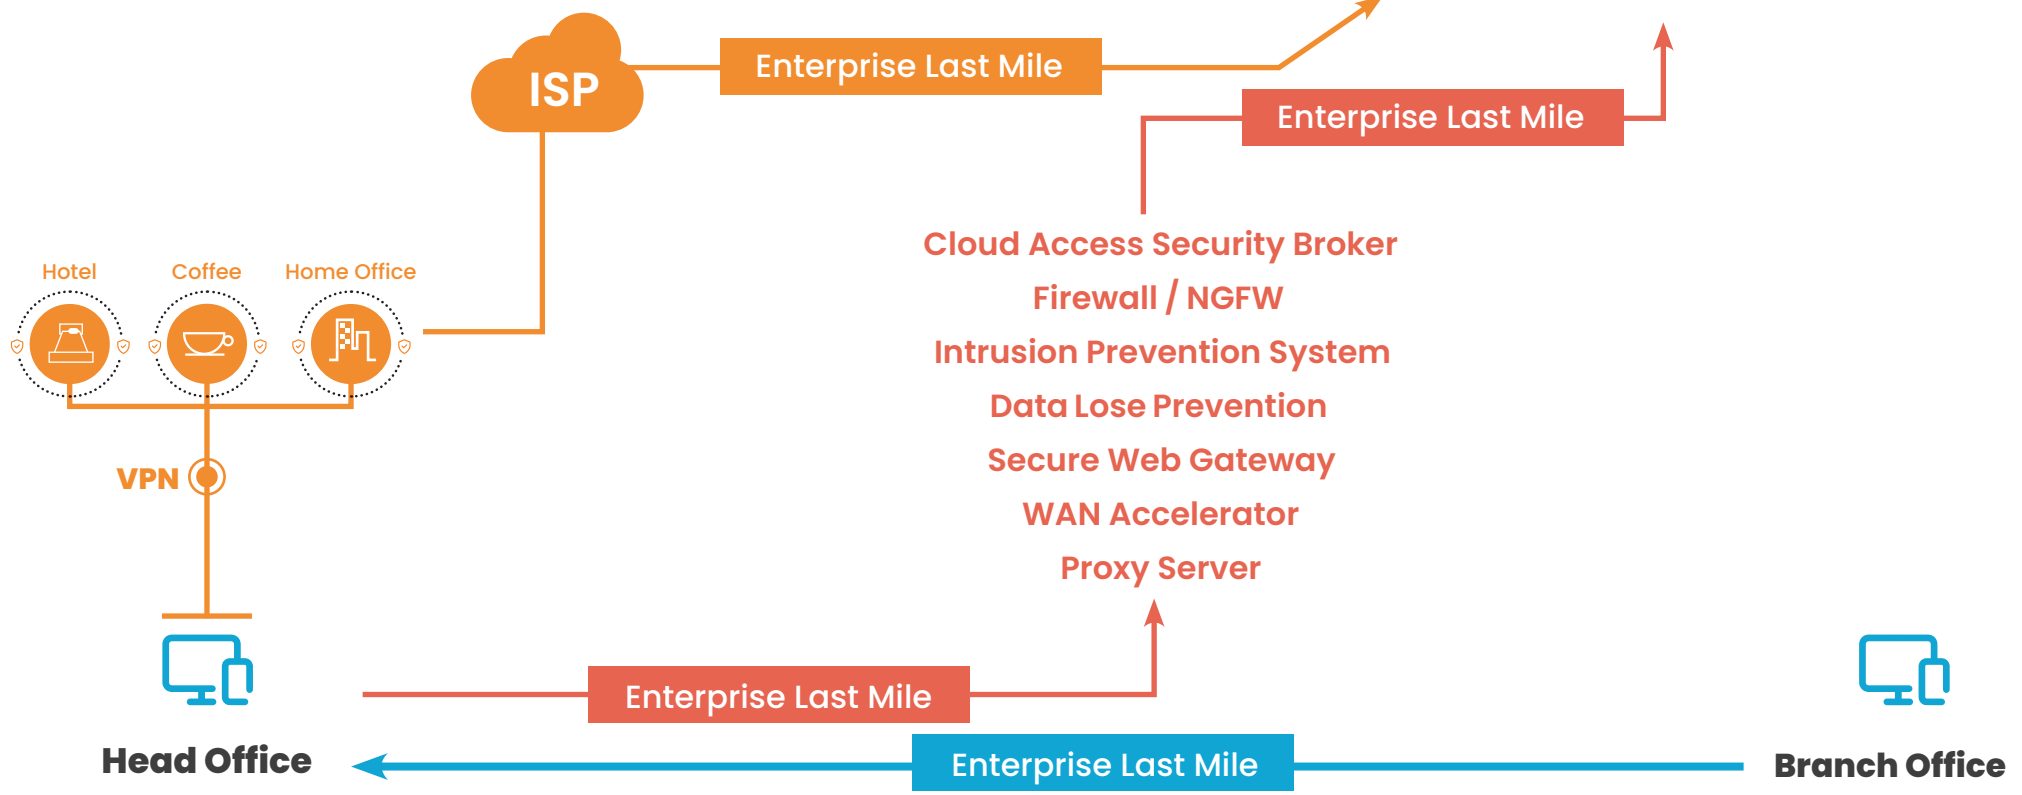

The foreseeable future will see us working remotely. And that requires our hard work to be backed by a digital infrastructure that keeps up with the changing needs of the times. It starts with the simple process of allowing on-site and cloud data to be accessed remotely by your team whenever they need it.

SECURE REMOTE BUSINESS

Introduction

It doesn't matter if you're working remotely when your businesses' infrastructure is bound to take you places. Get the best of services when you pair your business with Microsoft 365.

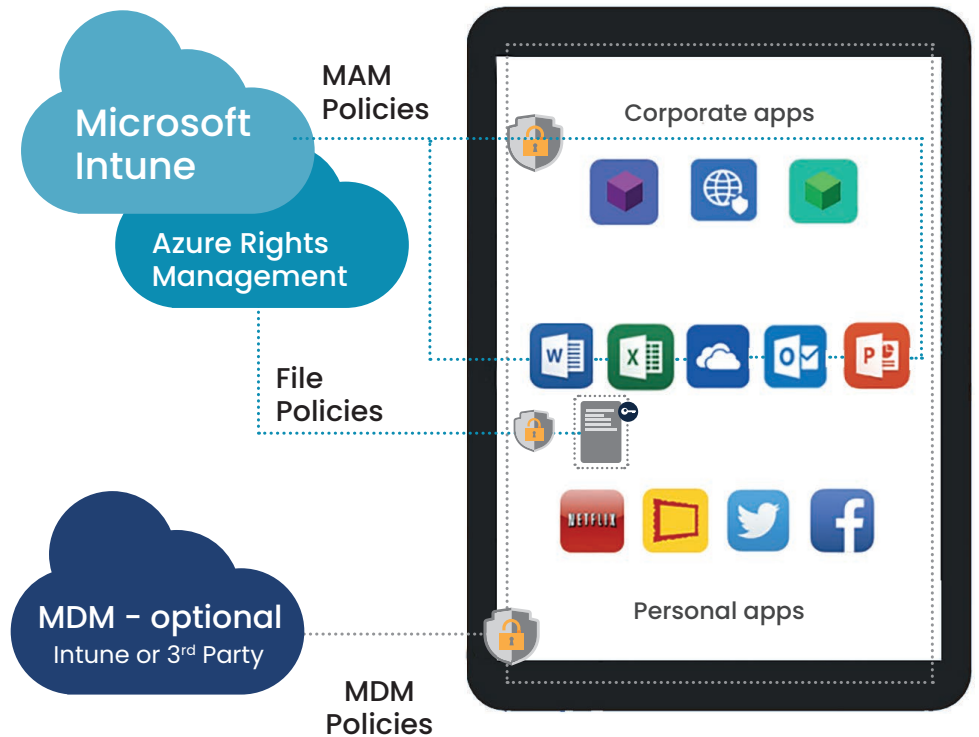

MOBILE PRODUCTIVITY

Introduction

It's 2021, and nobody can imagine having to go without their mobile phones. It's not just a calling device - it's something you can use to work while on the go, or to indulge in some networking - the possibilities are endless. Our dependency on our mobile devices has led to the introduction of Microsoft 365 mobile-first applications, built with care to cater to the needs of the mobile worker.

MANAGE MOBILE PRODUCTIVITY WITHOUT DEVICE ENROLLMENT

Enable familiar Office experience for employees. No enrollment

Prevent data leakage for Office mobile and other apps on unmanaged devices or devices managed by a third-party MDM.

Protect data at the file level for Office documents and more with Azure Rights Management.
